# CLUB STOCKTON SPONSORING DISADVANTAGED KIDS

**The Backpack Venture was established to address the critical needs of children in rural and remote schools, many of whom face financial challenges.**

The program aims to equip these students with fully stocked backpacks, containing all the essential supplies needed for a successful school year.

Recognizing that education is one of the most powerful catalysts for change, The Backpack Venture is committed to giving every rural child the opportunity to access quality education and unlock their full potential.

*The charity is only small, currently operating from a co-founders home. Through need, it has become so popular it needs to expand to a more suitable workspace to hold the essential school items that the children need. Club Stockton is delighted to help facilitate the building of a brand new shed to help with this.*
